

Home Video Security Systems

Written by Admin

The Watchguard Complete 4 Channel Digital Video Surveillance is one of the best home security systems to have at your homes. It can be installed easily, but it is better you get a professional home security system personnel to help you with the installation and setting up of the security system .e.g (connect to PC or network and monitor). The image is better than video in 4:3 format. The vision at night is good and it's up to 20m after that it is difficult to recognize people.

This home security system comes complete with 4 Day/Night weatherproof color cameras, power supply Cable, 4 Channel Digital Video Recorder with 500GB Hard Drive and 4 camera connection cables (2 x 10m - 1 x 20m - 1x 30m). It also comes with IR LEDs for viewing in total darkness up to 15m. The watchguard Complete 4 Channel Digital Video Surveillance can be purchase for both indoor and outdoor use.

This home video security system has a very smart and intelligent build-in Video Motion sensor which will start recording immediately when it detects any motion. It features allows live display, playback and record. After the home security system is completely setup, it is easy to control just like a DVD player with buttons for play, pause, RW, FF, search, etc. It is able to record up to 25 images frames per second on each of the 4 cameras and features H264 video compression technology. This home video security system is compatible with the Eagle Eyes iPhone Application, which allows you to connect the device to your iPhone for real-time footage viewing.
